Career Objective

Enthusiastic and detail-oriented Computer Science undergraduate with strong foundational knowledge in backend development, data structures, and OOP. Proficient in Python, Java, and the MERN stack, with hands-on experience in developing RESTful APIs and integrating cloud-ready applications. Demonstrated ability to work collaboratively on technical projects, with strong GitHub and project documentation practices.

Education

B.E in Computer Science , Keshav Memorial Engineering College, Hyderabad, India CGPA: 8.47	2022 – 2026
Intermediate - MPC , Kendriya Vidyalaya Tirumalagiri, Hyderabad Percentage: 84.3%	2020 – 2022
10th Standard - CBSE , Kendriya Vidyalaya Tirumalagiri, Hyderabad Percentage: 91.8%	2019 – 2020

Skills

- **Programming Languages:** C, Python, Java, JavaScript, MySQL
- **Web Technologies:** HTML5, CSS3, MERN Stack (MongoDB, Express, React, Node)
- **Languages Known:** English, Telugu, Hindi

Projects

AI Context-Aware Chat System

Built a Docker-ready, secure multi-user AI chat platform with persistent conversational memory and personalized knowledge graphs.

- Implemented JWT-based authentication with MySQL for secure user data management.
- Developed user-isolated Neo4j knowledge graphs to represent conversations and extracted topics.
- Enabled semantic search using vector embeddings for relevant context retrieval.
- Technologies: FastAPI, Python, Docker, JWT, MySQL, Neo4j, LLMs

AI Research and Blogging System

Built an AI-powered system using CrewAI, Google Gemini, and Serper API to automate tech news summarization and blog writing.

- Implemented role-based agents (Researcher & Writer) to sequentially gather real-time insights and generate markdown articles.
- Technologies: Python, CrewAI, Gemini 1.5 Flash, LangChain, Serper.dev, .env management

WIZKIDS (Quiz Web Application)

A quiz platform for assessing school childrens IQ in general knowledge and current affairs.

- Offers time-bound quizzes at Beginner, Medium, and Advanced levels.
- Rewards users with credit scores for correct answers.
- Participants receive online certificates, which can be upgraded by taking more challenging quizzes.
- *Technologies:* HTML, CSS, ReactJS, MongoDB, ExpressJS, NodeJS

Certifications

- C Programming Course – Udemy
- Second Year Project School – Keshav Memorial Engineering College
- Java Programming – NPTEL Online Certification
